Compassion always looks cool! - it's time to start our annual project under the Purge Poverty pillar. From the month of July, continuing all year long, it's time to make a difference and "Share your Style" with those who can't afford everyday wear and other household items that we take for granted.

If your closet is full of old clothes in good condition (or even new ones), why not help people that need them?

How to start:

- Step 1 Check your home and find clothes and things that you are not going to use anymore.
- **Step 2** Find a local, an area or a national association that collects & distributes clothes and other items for the less fortunate.

A local one, for example, could be a children's hospital looking for children's clothes.

Step 3 - Donate, instead of throwing away, you help the planet and your local community at the same time!

What can I donate?

It depends mostly on the need in your area that includes clothes for kids and adults, for men and women, household linen, blankets, towels, toys and products for personal hygiene.

What can I do if I have nothing to donate?

Start a social media campaign to increase awareness of what is needed in your area:

As Club: Facebook and Instagram are great tools for creating awareness. You can get in touch with local charitable causes and team up for the campaign. If you can organize a "Donation Day" in the main square of your city would be amazing!

As Area: If some of your clubs have a lot to donate but no one needs what they collect, share what you can collect with others Areas and with the entire association to find a place where those things are needed.

As Association: Help the local Clubs with social media & connect them with Clubs from different areas to encourage them to help each other. You can also donate to other Round Table Family Associations around the world!

For any help or questions please feel free to contact me.
